

# Is Your School's Environment Optimized for Success? Gardiner Does it.

Educators and school district administrators are faced with constant challenges. A physical environment that enables student achievement shouldn't be one of them. For over 20+ years, we have been the go-to company for Northern Ohio's school districts, providing quiet, well-lit, properly ventilated, and energy efficient settings for learning.

## HVAC Solutions.

### Operational Efficiency

By integrating smart controls and monitoring systems, we ensure that air quality, temperature, and humidity are optimized across your school buildings, creating a healthier and more cost-effective environment.

### Building Automation

Since 1985, Gardiner has provided open, scalable, and secure building automation systems. Our local team can help your district reduce energy costs and ensure your school is running on a reliable system 24/7.

### Energy

From optimizing air quality to controlling humidity, our solutions create healthier spaces that align with eco-friendly practices and green certifications. Gardiner focuses on the whole picture when it comes to energy for schools, keeping energy spending and costs low.

### Planning & Funding

Costs, budgets, and financing have become more important than ever before for districts. Gardiner's financial solutions provide schools with a full range of tools, including grant procurement, shared savings, and even complete project financing.

### Lighting

Beyond heating and cooling, lighting often represents the highest energy cost for K-12 buildings. Through control systems, high-efficiency LED lighting, and more, Gardiner can provide lighting solutions that reduce costs and create energy savings for your district.

### Indoor Air Quality (IAQ)

Take advantage of research backed solutions like filtration, ultraviolet germicidal irradiation, bipolar ionization and more when partnering with Gardiner. Our solutions ensure optimal air quality and healthier environments, creating better learning conditions for students and staff.
